

AGENDA
STRATEGIES FOR PROJECT IMPLEMENTATION WORKSHOP II
MID AND UPPER SACRAMENTO RIVER REGIONAL FLOOD MANAGEMENT PLAN
October 8, 2014 (8:30 am to 12:00 pm)
3770 Highway 45, Colusa, CA 95932

PARTICIPANTS:

- MUSR RFMP Stakeholders

WORKSHOP GOALS:

- Continue the September 18th Strategies Workshop discussions for Stakeholders to further learn and refine how projects may be best positioned for implementation.
- Focus on six key Mid Upper Sacramento River Sub-Areas to further discuss collaborative opportunities to meet as many of the CVFPP objectives as possible to support development of competitive projects for future funding.
- Discuss with the natural resource agencies as well as with representatives of TNC, River Partners, and state and federal wildlife refuges how to leverage multi-benefit opportunities on conservation properties.
- Continue the dialogue on next steps on mutually beneficial goals to implement projects in the second phase of the Regional Flood Management Process.

PREWORK: Each Stakeholder should work within their respective organizations and come prepared to discuss the following:

- Review the Project List table to have a better understanding of how projects of the six sub-areas (identified in the Agenda below) will a) support the Primary CVFPP Objectives, and b) align with the supporting CVFPP objectives to improve flood risk management, O&M, ecosystem function, and institutional support; and promote multi benefit objectives. Put an “x” in the corresponding columns of the attached worksheet. Review the following list of questions that we will be discussing in breakout sessions to review the proposed projects. Come prepared to add to the discussion.
 - How can the 6 sub-areas that were identified in the September 18th Workshop reflect the most alignment with the CVFPP objectives by the number of “objectives met”?
 - Which projects are “implementation ready” (eg. CEQA, permitting complete) and only need funding?
 - Which of your projects connect with another nearby project—either to increase project efficacy or increase support of CVFPP Objectives?
 - How can we leverage some potential multi-benefit projects either onsite or through one of the Environmental Asset properties?

AGENDA

TIME	DISCUSSION	OUTCOME
8:30 AM	City of Colusa Complex <ul style="list-style-type: none"> • Introductions • Re-evaluate map to discover <ul style="list-style-type: none"> ○ How many of the CVFPP Objectives can be met ○ Where the Environmental Asset Properties may be relevant to project implementation ○ How the Resource Agencies envision implementation success ○ Next Steps 	<ul style="list-style-type: none"> • Refine project implementation opportunities for multi – benefits, funding and partnership success • Identify next steps for Phase II of the Regional Flood Management Plan process
9:00 AM	South of Tisdale Weir (RD 108, RD 1500) <ul style="list-style-type: none"> • Canal 14A • Set back levees on Sacramento River • Colusa Drain • Fish Passage at Knights Landing • RD1500 • Introductions • Re-evaluate map to discover <ul style="list-style-type: none"> ○ How many of the CVFPP Objectives can be met ○ Where the Environmental Asset Properties may be relevant to project implementation ○ How the Resource Agencies envision implementation success ○ Next Steps 	<ul style="list-style-type: none"> • Refine project implementation opportunities for multi – benefits, funding and partnership success • Identify next steps for Phase II of the Regional Flood Management Plan process
9:30 AM	Sutter Bypass (N of Tisdale) <ul style="list-style-type: none"> • RD 1660 / RD 70 • Private Duck Ground • Sutter Refuge (Water supply/fish barriers / weir 1 flows / Butte Slough) • Upper Bypass (flood conveyance) • Introductions • Re-evaluate map to discover <ul style="list-style-type: none"> ○ How many of the CVFPP Objectives can be met ○ Where the Environmental Asset Properties may be relevant to project implementation 	<ul style="list-style-type: none"> • Refine project implementation opportunities for multi – benefits, funding and partnership success • Identify next steps for Phase II of the Regional Flood Management Plan process

- How the Resource Agencies envision implementation success
- Next Steps

10:00 AM Princeton, Riparian Sanctuary

- Riparian Sanctuary Project
- LD 1 & LD 2 Erosion Sites
- Introductions
- Re-evaluate map to discover
 - How many of the CVFPP Objectives can be met
 - Where the Environmental Asset Properties may be relevant to project implementation
 - How the Resource Agencies envision implementation success
 - Next Steps

- Refine project implementation opportunities for multi – benefits, funding and partnership success
- Identify next steps for Phase II of the Regional Flood Management Plan process

10:30 AM Tehama / Glenn Counties

- Introductions
- Re-evaluate map to discover
 - How many of the CVFPP Objectives can be met
 - Where the Environmental Asset Properties may be relevant to project implementation
 - How the Resource Agencies envision implementation success
 - Next Steps

- Refine project implementation opportunities for multi – benefits, funding and partnership success
- Identify next steps for Phase II of the Regional Flood Management Plan process

11:00 AM Butte Creek / Chico Areas

- Butte Basin/Durham/Richvale/Nelson
- Chico & Nord
- Introductions
- Re-evaluate map to discover
 - How many of the CVFPP Objectives can be met
 - Where the Environmental Asset Properties may be relevant to project implementation
 - How the Resource Agencies envision implementation success
 - Next Steps

- Refine project implementation opportunities for multi – benefits, funding and partnership success
- Identify next steps for Phase II of the Regional Flood Management Plan process

11:30 PM Large Group Wrap Up

- Observations to Share
- Proposed final November 12th Meeting (9:00 to 11:00 am)
 - Financial/Funding
 - Map Consolidation
 - Projects' Attributes
 - Collaboration Opportunities
 - Summary of the Matrix
 - Presentation Final Draft – Closing the Chapter not the Sequel!

- Understand next steps

12:00 PM Adjourn
